

European Sensory Network

your partner for sensory & consumer research

The European Sensory Network (ESN) is a powerful international network of leading research institutions and industrial partners at the cutting edge of sensory and consumer sciences.

ESN members and partners share their knowledge and expertise to explore the value and applications of sensory sciences in food and non food industrial practices.

ESN offers opportunities for

- international networking at the highest level
- cutting edge research in sensory and consumer sciences through our partner research programme
- international seminars and conferences up-to-date methodological guidelines (standardization)
- consulting concerning sensory methods, market research, setting up of sensory and consumer studies, project design, data treatment and interpretation, questions about behaviour and perception

„ESN makes it easy for you to find the best sensory and consumer partners for your needs.“

Direct ESN-Industry Network Partnerships

Since 2008 ESN has established direct ESN-Industry Network Partnerships for industries that are interested in collaborating

more closely with the ESN in order to focus research activities on questions of the most practical relevance to the industry.

The ESN-Network Partnerships are seen as an interface for practical collaborative research and the development of innovative methods and approaches in sensory and consumer sciences.

The partnerships give industrial companies and ESN members enhanced networking opportunities. Find more information on our website: www.esn-network.com/about-us/industrial-partners/partnership0/.

Currently, there are more than 40 members and industry partners working together in ESN.

The power of international co-operation

A focus of ESN activities is on cross-border studies. ESN offers numerous close cross-border links between sensory scientists and industrial partners. These collaborations have proven to be very valuable.

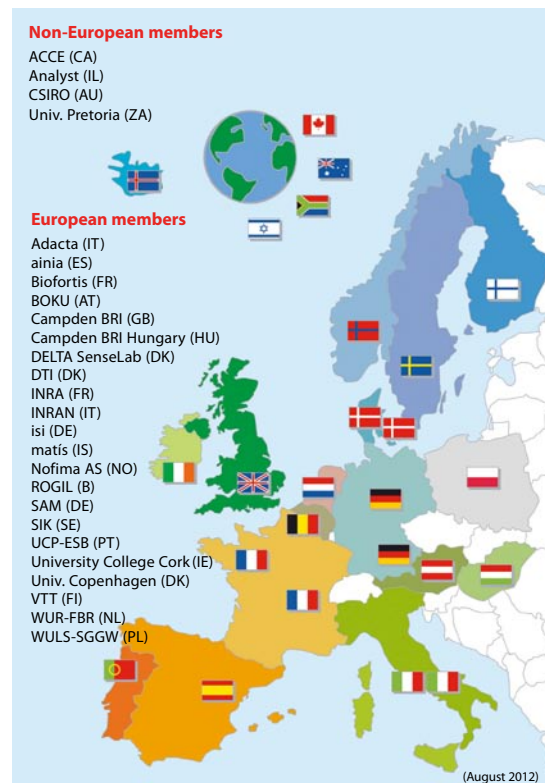

The well established contacts among ESN members make it easy to plan and perform international studies, and guarantee exceptional research following universal standards.

Visit us online: www.esn-network.com

Valuable source of information

The ESN website provides up-to-date information for the sensory community such as:

- new sensory findings
- database of scientific publications
- congress and seminar proceedings
- job offers
- links to the sensory world
- Event calendar
